Receptiv offers a full compliment of reception furniture, consisting of modular base and top units, supplied in various sizes and finishes with accessories such as paper storage, CD racks and key lockers as well as

integrated pedestals. Low-level glass shelves on steel supports offer a more open and inviting approach to the desk. Specific modules allowing for wheelchair access, accommodating the DDA requirements are also available.

Space is money as property and letting has risen to new heights in recent times; and so has the demand for more compact receptions. With technology having advanced and most offices already using space saving flat screen monitors, there is no real need for very deep desking space and therefore Receptiv is the solution - with 600mm deep units to accommodate today's needs without losing any of Receptiv's appeal.

A cable management facility is incorporated into desktops and panel legs with the use of cable ports. Cable trays are also available as an additional option. All these options will introduce flair, variety, flexibility and not to mention practicality to any office environment.

semiflow

Receptiv in a semicircular layout for a dramatic impact in Santiago Cherry wood finish, bringing a contemporary warm feel to any reception environment. Contemporary glass shelf shapes that can be aligned to create a continuous flow with brushed stainless steel shelf supports complement its overall appeal and flair.

A durable kick plate with a brushed stainless steel finish not only protects the unit but also enhances its overall aesthetics.

traditional

The main image: Traditional in style with the walnut finish and silver kick plate, displaying a classical luxurious glass shelf, as well as a radius base unit that allows wheel chair access. A mobile storage unit is neatly tucked under the base unit. Waved top units enhance the overall aesthetics. The inset shot shows a simple segment base unit with the new desk height pedestals and top units making it a unique compact reception alternative.

freeflow

The Receptiv range is designed to create that all important first impression. Manufactured in-house, this style consists of a modular base and counter units in five standard imperial board finishes.

Distinctive ash and silver mirror colour options enhance the overall aesthetic appeal of the office. Concave or convex base and counter units give Receptiv total flexibility, with almost endless configurations.

multiflow

Multiflow is another creative configuration, using apple and contrasting silver shelving. Recessed radius counter tops allow desk space to be used to its maximum. The addition of paper storage trays, CD racks and a shelving unit allow the user to maintain an effective and professional working environment.

The use of kick plates not only protects the unit from damage but also complements its aesthetic appeal.

uniflow

Uniflow offers a more traditional look. Configured using 800mm wide radius as well as 800mm and 1200mm wide rectangular units, this style offers additional extras such as paper storage trays and is complemented by a contrasting cherry and silver finish.

Stylish counter shelving can also be incorporated to produce the ultimate effect.

contemporary

Crisp, fresh and modern is its first impression. Ideal for hair salons, beauticians, opticians, dental surgeries and travel agents. The new 600mm deep base units give us the opportunity to provide far more compact and space saving reception layouts and by using the shallow top unit as a shelf, this configuration offers good sight lines as well as hiding unsightly items.

compact

This unique layout is designed as a freestanding unit, suitable for office reception or information centre use. The hatch and door allow ease of access in or out of the reception and kick plates are used to prevent damage as well as enhancing the overall appearance.

segflow

Perfect to fit into the corner of a reception room. This configuration displays style as well as an extremely user-friendly working space and includes our new desk height pedestal that has taken on the appearance of the Receptiv front.

receptiv coffeetables

A range of reception tables to complement the Receptiv range is available in two styles - either tapered legs or a unique curtain base, both with standard imperial board finishes.
